

**Course Title:** *LEAN Continuous Improvement Green Belt Workshop*

### **Course Description**

Lean is about looking at work in a new way; a way focused on making work more effective so that you can be more effective. Lean is a methodology and a set of tools and resources that will allow you to identify and eliminate waste (anything that does not provide value to customers is considered waste), creating more value for customers (internal and external) without adding more resources.

LEAN is not a tactic or a cost reduction program, but a way of thinking and acting for an entire organization. Lean thinking is Lean because it provides a way to do more with less – less human effort, less equipment, less time, less space – while coming closer to providing exactly what the customer wants.

Dr James P. Womack, Lean Enterprise Institute

### **Learning Objectives**

In this workshop you will learn:

- A new way of thinking about the work you do and how you do it
- How to identify improvement opportunities that will improve the work you do and provide better service to your customer (internal or external)
- What actions to take to get the desired results
- How to earn a Lean Green Belt Certificate

**Open to:** All Employees

**Course Length:** Four Hours
